FACT SHEET

CRITICAL CONSUMER AND IP PROTECTIONS SUPPORT AMERICAN INNOVATION, JOBS AND COMPETITIVENESS

The U.S. House of Representatives has included both the SHOP SAFE Act and the INFORM Consumers Act in H.R. 4521, the America Competes in Manufacturing, Pre-Eminence in Technology, and Economic Strength Act (America Competes Act). These initiatives strengthen the America Competes Act and strive to protect all American households that are increasingly shopping online, especially since the onset of the COVID-19 pandemic.

THE SHOP SAFE ACT & THE INFORM CONSUMERS ACT:

- Help protect consumers from counterfeit products that could harm their health and safety and from criminals who could invade their privacy and steal their financial information.
- Safeguard brand owners, their innovation, and the jobs they create across the United States from intellectual property (IP) theft.
- Bring accountability to online marketplaces.
- Make it harder for criminals to profit from illicit actions.

PROTECT CONSUMERS

- The ongoing COVID-19 pandemic shifted how frequently consumers shop online, likely permanently, with online spending up 42% since 2020—according to Adobe.
- The National Association of Manufacturers (NAM) reports that this growth in online shopping has been accompanied by a surge in the sale of counterfeits, meaning greater consumer exposure to health and safety risks, including the availability of fake over-the-counter medicines, testing kits and masks, replacement water filters for refrigerators, automotive parts, apparel and footwear and toys.
- SHOP SAFE and INFORM require online sellers to comply with the same, long-established federal health and safety regulations that govern all other commercial transactions.
- AARP explained that privacy concerns are rising, especially among older people, with 83% lacking confidence that what they do online remains private. SHOP SAFE helps protect consumers from criminals using the sale of fakes online to steal personal/financial data.

SAFEGUARD AMERICAN JOBS, BRANDS, AND INTELLECTUAL PROPERTY

- NAM estimates that counterfeits steal nearly $131 billion from the U.S. economy, using 2019 NAM metrics.
That means $22.3 billion in lost income for American workers, 325,542 fewer American jobs, $5.6 billion in lost federal tax revenues, and nearly $4 billion in lost state and local tax revenue according to NAM.

Counterfeiting and illicit items impact America’s bottom line, challenge domestic manufacturing and harm intellectual property, hampering American innovation and creativity.

**BRING ACCOUNTABILITY TO ONLINE MARKETPLACES**

- The SHOP SAFE Act will establish better and uniform rules for secure and safe conduct of e-commerce in the United States. This will immediately require online sellers to play by the same rules that have safe-guarded American consumers and governed business and for more than a century.

- At its core, the Act holds online marketplaces accountable, and liable, for screening third-party sellers, disclosing more information about the seller to online shoppers, removing counterfeit and stolen product listings, and barring bad actors from selling on their platforms – consumer and small business protections that have all been missing for far too long.

**MITIGATE CRIMINAL ACTIVITY AND IMPROVES NATIONAL SECURITY**

The U.S. Department of Homeland Security (DHS) cautions that counterfeiting is a threat to our national security and public safety.

- As noted by the United Nations, counterfeiting plays a key role in the operations of transnational criminal organizations and “helps fund other criminal activities such as extortion, illegal drugs and human trafficking, compromises the international financial system for money laundering purposes and, ultimately, makes it more difficult for existing law enforcement measures to be effective.”

- Reports detail how terrorist networks organize the manufacture and distribution of counterfeits to finance their military operations.

*The legislation would require online platforms to vet sellers before allowing them to sell and provide consumers more information about who they are buying from so they can make informed decisions and protect their personal data. Both the SHOP SAFE Act and the INFORM Consumers Act are bipartisan and bicameral.*
